

Personal Listening

Listen to any TV channel on your Smartphone

The Personal Listening System from Listen Technologies transmits audio from any TV or background music source to Smartphones or tablets using a standard, separate Wi-Fi network. The system offers many benefits to both the customers and the venue. The app for Personal Listening is available for both iPhone and Android devices.

How it works

Key Venue Benefits

- Provides customers with a unique and positive sound experience, building customer loyalty and retention.
- Lowers cost of ownership and increases utilization of existing equipment.
- Easy installation, low maintenance and excellent support!

Key Customer Benefits

- Customers can listen to any TV using their own Smartphone or tablet.
- Customers use their own ear buds and have more freedom over their sound experience.
- The app is easily downloaded from an iPhone or Android in seconds.

Customer Feedback

"Easy installation, low maintenance and excellent support!"

"Love how simple it is."

"It really has a wow factor."
